a three-sided event management platform — (سنيـع) This guide defines the visual language of **Sunai** connecting clients, vendors, and administrators across Saudi Arabia. The brand is built on the calligraphy wordmark: pure ink black for authority and precision, forest green for growth, trust, and the richness of Saudi event culture. Every token in this document is the single source of truth for the .product UI

SPACING SCALE

BORDER RADIUS

SHADOWS

Duration & Easing

DURATION

150ms — hover, icon swaps		fast
250ms — card lift, panel open		normal
400ms — page enter, modal in		slow
600ms — skeleton-to-content reveal		slower

EASING CURVES

spring

`cubic-bezier(0.34, 1.56, 0.64, 1)`

Slight overshoot — buttons, cards, badges

default

`cubic-bezier(0.4, 0, 0.2, 1)`

Standard ease-in-out for most transitions

easeIn

`cubic-bezier(0.4, 0, 1, 1)`

Exit animations — elements leaving view

easeOut

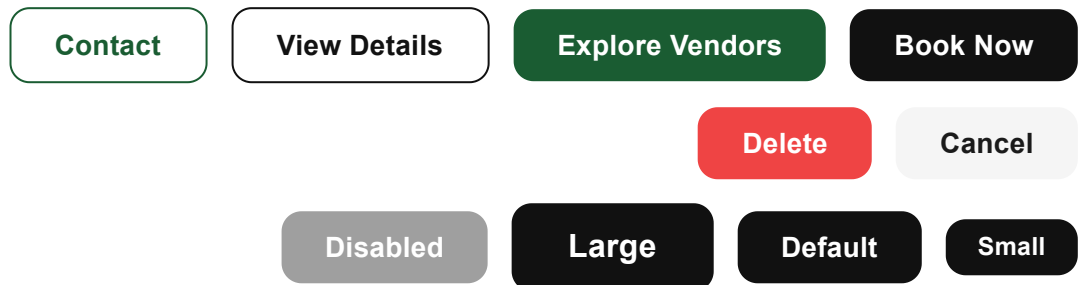

`cubic-bezier(0, 0, 0.2, 1)`

Enter animations — elements sliding in

Principle: Motion should feel purposeful and never decorative. Use *fast* for micro-interactions (hover feedback), *normal* for layout shifts, *slow/slower* only for screen-level transitions. Keep all transitions under .600ms to respect users with prefers-reduced-motion

Navigation

MOBILE BOTTOM NAVIGATION

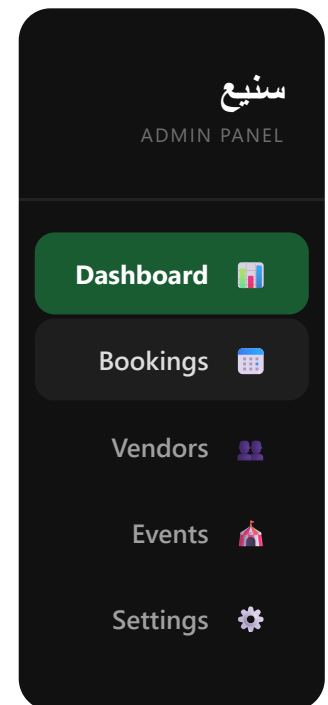

.Active item uses jet-black with light muted background. Inactive items use neutral-400

ADMIN SIDEBAR

The admin sidebar uses the jet-black surface (--sidebar-background). Active navigation items are highlighted with forest green (--sidebar-primary) for clear wayfinding. The logo appears inverted white via `filter: brightness(0) invert(1)`

Surface
sidebar-background · #111111--

Active Nav
sidebar-primary · HSL(142 50% 40%)--

DO'S & DON'TS

DON'T X

- Never stretch or distort the logo
- Never use low-contrast color combinations
- Never mix purple, orange, or gold with the brand
- Never place the logo on a busy photograph
- Never use font weights other than 400 or 700

DO ✓

- Use jet-black for primary CTAs
- Use forest green for accent / active states
- Maintain clear space around the logo
- Keep the logo on white, black, or forest surfaces
- Use Almarai for all Arabic text
